EXTRACT LABS HEMP TINCTURES

Consumers are increasingly discovering the wellness dividends of hemp oil tinctures and using them as natural alternatives to prescription medications to relieve the symptoms of a host of conditions. Among the best values on the market are those from [Extract Labs](#), a Boulder, Colorado-based full-service hemp extraction lab offering a proprietary line of boutique CBD-infused products. These exceptionally pure tinctures are offered at the lowest price points possible since the company keeps every step of production in-house.

- Made of oil that has been CO2-extracted from industrial hemp plants grown only in Colorado
- Rich in cannabidiol (CBD)
- Uses a base of fractionated coconut oil – the purest form of coconut oil
- Non-psychoactive
- Legal in, and can be shipped to all 50 states
- A versatile CBD product that has been used to help both people and animals
- Consumer testimonials indicate the tinctures are used to support wellness in a number of ways, including relieving symptoms of anxiety, depression, insomnia, inflammation, epilepsy, chronic pain, PTSD, etc.
- No medical card is needed to purchase
- Can be taken sublingually or applied topically
- Available in 15, 30 and 60 ml. dropper bottles, with MSRPs ranging from \$40 to \$210 depending on size and strength; flavors include Unflavored and Lemon
- Extract Labs was founded by combat veteran Craig Henderson, and today employs a team of 20+ out of its Boulder, CO labs and recently added Louisville, KY labs
- For any user questions or health concerns, please check with your doctor
